1. I did not add any additional functions, but I did expand further on the required concepts. I also did a UML diagram for the whole project because I thought that it was required.
2. Not incomplete
3. The easy part of the assignment was implementing the inheritance into the project. The challenging part of the assignment was trying to implement the interfaces and abstraction because I still do not fully understand what these two do.
4. I learned that I need to start coding assignments earlier than I think I need to.
